The service seeks to assist individuals with sight problems by providing:-

- Information about local and national services
- Referrals to a wide range of community services
- Counselling and support
- Advocacy for individuals affected by sight loss
- Awareness raising in the community about visual disability

We also seek to provide a friendly ear and will try to be as helpful as possible. If you are coming to terms with recent sight loss or have a question to ask, we may not have all of the answers but make a good starting point.
